Dear Business Partner,

In 2023, our hotel was awarded the **Green Key** Ecolabel, which is the leading standard of excellence in the field of environmental responsibility and sustainability in the tourism industry, and signifies the commitment of companies to adhere to the strict criteria set by the international Foundation for Environmental Education or the FEE. The award of the label recognises **EXCELLENCE IN THE FIELD OF ENVIRONMENTAL RESPONSIBILITY AND SUSTAINABILITY**

We declare that:

- We are environmentally friendly in all areas of our business,
- We raise awareness about the importance of sustainability among our friends, family and visitors; and
- We are constantly looking for new solutions to manage natural resources responsibly and to use electricity and heat efficiently.
- We inform our guests of Slovenia's precious treasure - drinkable water and encourage them to be mindful of water consumption.
- We enjoy the local wealth of natural and cultural heritage.

Doing so is first and foremost beneficial for the environment. In most cases, this kind of environmental care is about small measures that do not mean a major effort or sacrifice of comfort for any of us. It only takes simple and subtle actions, but if we all do them together, we can change the world for the better and leave it to our descendants as we got it from our ancestors.

That's why our hotel is calling out to you with "environmental sparks". Awareness-raising is an important prerequisite for the Green Key Label. With all our activities, we encourage our guests to be responsible towards the environment, within this we will contribute together to the preservation of our planet.
